

product

blackspot and longlife algicide

DESCRIPTION

A dark blue liquid in ready to use form.

ACTIVE CONSTITUENT

Cationic Algicide Benzalkonium Chloride (100g/pl)
and Organocopper Complex (50g/pl)

AVAILABLE SIZES

1 litre 5 litres 20 litres

PRODUCT BENEFITS

- Regular use will help overcome problems caused by algae which increase chlorine demand.
- Assists chlorinator cells to cope with increase in demand particularly during Summer.
- Controls algae, bacteria and fungi in swimming pools and ornamental water.
- Particularly effective on green, red, brown and black algae.
- Does not interfere with filter operation.
- May be used as a long term algicide or winteriser.
- Algaestat properties help keep algae in a dormant stage.

NOTES

Dosage rate for Focus Blackspot and long life Algicide is 1 litre per 50,000L of pool water. Some slight foaming will occur on initial application but will soon dissipate.

Care should be taken to ensure chlorine levels are under 1.5ppm upon initial application.
